SimplePart 101: Intro to the SimplePart Platform and Knowledge Base ⚠

Welcome and thank you for being an enrolled SimplePart program dealer! This article is geared toward introducing you to everything you need to know to establish a solid foundation as you navigate the SimplePart product and its features.

After we process your signed dealer agreement, you begin the setup process. During this time, the SimplePart Client Services team will be in contact with your Business and IT offices as we set up your new website.

 During the setup process, you can also choose which payment providers are best for you and your customer base. We'll also guide you through a comprehensive training session so that your new parts website is ready to go to market when you are.

 To help you get started, you should get to know your center of operations, The SimplePart Control Panel. Check out the video below:

To see more videos, visit the tutorials section of our knowledge base.

 And don't forget--the Welcome Packet and the Parts Manager Toolkit are great resources for tips and information.

Got a question? You can reach out to the SimplePart Client Services team at support@simplepart.com or call us at (888) 843-0425.
